

Core team: layers, PM join & roadmap work

Slug: core-team | Category: core

Summary

Apply on </businesssite/core/recruit> for a layer×role post. After Appoint you get a SLUG, HR track, roadmap tasks, and auto-join to the BusinessSite PM layer subproject (Data/System/User/Security/App) with the right team and role.

Guide

Five layers × four roles

Core team posts: Data, System, User, Security, App × Architect, Analyst, Admin, Developer
(20 public posts on </businesssite/core/recruit>).

After Appoint

- Unique SLUG (e.g. da01) + setup guide at </businesssite/core/setup>
- Optional SA junior/intern contract + HR employee
- Roadmap Odoos tasks for your layer×role on BusinessSite Team - {Layer}
- Auto-join PM: layer subproject BS-DATA ? BS-APP under hub BS-CORE
with team membership and mapped role (architect?manager, analyst?lead, admin/developer?member)

Where to work

- BusinessSite ? Projects - PM hub & layer subprojects (status, meetings, timesheets)
- Project app - detailed tasks under BusinessSite Team - {Layer}
- Chat: my projects · project help · log time ?
- Roadmap: </businesssite/roadmap> · phase docs under </docs/roadmap/>

UAT

Test packs: ?Business project management? and ?Core team join PM layer subprojects? on </businesssite/uat>. Analysts lead Data/System/User/Security/App testers
(see guide uat).

Chat commands
