

Senior core: junior mirrors & merge to mainstream

Slug: senior-core | Category: core

Summary

career_level=senior (any role): exclusive junior mirror desk at /businesssite/core/mirrors, merge queue (gate only). SLUG + own sandbox still apply. Analysts: no git clones. my mirrors · merge queue · guide senior-core.

Guide

Senior core team onboarding

Senior means career_level = senior on your core team member record
(Architect, Analyst, Admin, or Developer on any of Data / System / User / Security / App).

Seniors still get a personal SLUG, cloud mirror, and localhost bootstrap - the same slug process as juniors - plus exclusive access to every junior's mirror for review and facilitating merges into mainstream.

Appoint / promote

- Applications: Appoint senior (vs Appoint junior)
- Existing members: team member form ? Mark senior
- Grants group BusinessSite Senior Mirror Reviewer (re-login)

Exclusive junior mirrors

Portal: /businesssite/core/mirrors

Juniors (intern / junior) cannot list peers. Mid stays private in MVP.

my mirrors

request merge SLUG summary?

merge queue

approve merge MR?

reject merge MR?

Merge to mainstream (gate only)

- Review junior work in their cloud-dev-{{slug}} mirror / DB
- Submit or approve a merge request
- Approve writes a JSON gate under uat_gate/merge_to_mainstream/ - no auto git push
- Senior/System Architect runs the deliberate merge to cloud-dev / master

Git vs mirrors by role
